

NCR APTRA Cash Connect

NCR APTRA™ Cash Connect is a rich **banking software** solution offering either online or offline connectivity to Teller Assist Units such as cash recyclers, cash dispensers and coin dispensers.

Key Features

- Cash handling for withdrawals, deposits & exchanges (a combined withdrawal & deposit)
- Multiple currencies and sets of denominations can be defined, along with different note mixes for withdrawals.
- Enhanced **banking software** security
- Transaction receipt printing
- Reports providing totals and sub-totals by user, workstation or Teller Assist Unit
- Comprehensive Software Developers Kit

For use offline, APTRA Cash Connect has its own intuitive, easy to use teller application. As well as allowing tellers to perform various transactions, it also provides configuration, operational and maintenance management functions on the TAU.

For online integration, APTRA Cash Connect includes an extensive Software Developers Kit (SDK) that supports a range of software technologies and provides developers with a set of specially designed Application Programming Interfaces (APIs). In addition, the SDK comes complete with documentation, sample programs, test harnesses and test scripts to aid developers as much as possible.
