

NCR APTRA™ OptimizeCF

Want to optimize cash supply chain management
without the IT overheads?

YES

Let us host your cash management solution for you

NCR APTRA OptimizeCF is a “Software as a Service” (SaaS) solution that provides access to all of the features of NCR APTRA Cash Management technology without requiring an extensive IT investment. NCR provides the necessary secure physical infrastructure, ensuring that all regulatory requirements and policies are followed for the hosted solution. For users who want to benefit from a cash management solution but don’t have the resources to dedicate to an in-house system, APTRA OptimizeCF is the answer.

- **Optimized cash supply chain management**

APTRA OptimizeCF addresses cash activity through the entire supply chain, including all ATMs, branches, security carriers and central vaults. Process optimization and automation are achieved through workflow oriented designs, cash inflow and outflow tracing, advanced risk management reporting, “what-if” simulations and easy-to-use exception analysis tools.

- **Stay focused on the cash**

APTRA OptimizeCF is a SaaS solution, meaning that configuration and daily tasks required by banking staff to maintain the system are significantly reduced. Instead, a simplified user interface and workflow process allows users to concentrate on cash management rather than IT management.

- **Proven cash management**

APTRA OptimizeCF uses NCR APTRA OptiCash as the basis of the SaaS solution. APTRA OptiCash is the most comprehensive cash management software solution available and is proven with over 17 years of presence in banking and money center applications worldwide.
