

NCR APTRA™ Edge

Would you like more flexibility
for your self-service channel?

YES

More choice for you and your customers

NCR APTRA Edge is the leading, highly flexible self-service application designed for use in any host environment. It's an open solution based on Microsoft® Windows®, enabling you to simultaneously offer self-service applications from different hosts and deliver them across hardware from multiple vendors. You can also 'step migrate' transactions to a new host, making it easy to manage costs and resources, while your customers continue to enjoy the proven benefits of this leading self-service application.

- **A customizable solution**

No matter which host environment you currently use—or change to—NCR APTRA Edge can be readily customized to communicate with it, quickly delivering all the functionality of a leading self-service application to your customer base.

- **Transactions that are quick and easy to deploy**

NCR APTRA Edge will drive transactions across Windows-based ATMs from any number of third-party vendors. Most of the self-service transactions you'll ever need are included (cash dispense, receipt print, bill payment, PIN change and envelope deposit), so you can start delivering the services and functionality your customers expect immediately.

- **Advance your set of ATM transactions**

There's the option to add more advanced applications, such as airline ticketing, Initial Public Offerings (IPOs), intelligent cash and check deposit, including capturing an image of the check and printing it on the receipt. This enhanced support for deposit automation can play a major part in a successful transaction migration strategy.

For more information, visit www.ncr.com,
or email financial@ncr.com.

- **Connecting your enterprise**

As well as having the capacity to connect to any host environment, NCR APTRA Edge can connect to different hosts at the same time. This allows you to leave existing transactions where they are on your current host, and offer new applications and transactions from other hosts. So now your ATMs can present the same balance as your Internet banking site by connecting to your IFX Internet banking host.

- **Use the web to provide new services**

NCR APTRA Edge can be quickly adapted to offer services from non-traditional sources, such as external web servers. Web servers are being used to provide customers with non-cash services, such as sports results, news updates, airline reservations and cinema tickets. Add redeemable or branded coupons to the mix and you can provide a more memorable consumer experience and build loyalty, too.

- **Comprehensive services support**

NCR APTRA Edge is backed by NCR's unmatched professional services organization. With more than 800 professionals worldwide who live, eat and breathe APTRA, you know you are never far from the skills you need to achieve and maintain a world-class self-service channel.

- **Maximum security**

APTRA Security and Solidcore for APTRA provide unmatched, next-generation security for APTRA Edge, protecting against the intrusion of any unauthorized code and leaving a precise audit trail of all attempted updates. NCR APTRA Edge provides support for Triple DES to reduce fraud liability; it was the first self-service application to receive EMV Level 2 accreditation.

- **Linkage with other APTRA solutions**

APTRA Edge supports and is seamlessly compatible with all products in the APTRA suite. For example, APTRA Vision and APTRA Exchange manage and monitor your network while APTRA Promote and APTRA Relate deliver high-impact and personalized marketing.

Key Features

- Connects to any host
- Connects to multiple hosts
- Ready-to-use set of standard ATM transactions
- Rich multimedia presentation
- New services can be easily added
