

NCR Personal Scanner

Do you need an affordable Remote Deposit Capture Solution for small business?

YES

Bringing Remote Deposit Capture to small businesses

It's never been easier for your small business customers to make a deposit. NCR's Personal Scanner is a small, low-cost, easy to install, USB-powered image scanner that enables your customers to scan and deposit checks without leaving their location. Both sides of the check are digitally captured in a single pass and are electronically transmitted to your back office operations for processing.

- **Your customers will reduce costs, enhance security and realize revenue sooner**

Using the NCR Personal Scanner, coupled with the NCR APTRA™ Commercial Passport application, your time-constrained business customers can eliminate trips to the bank to deposit checks. Small businesses can immediately, as transactions are completed, deposit checks at the source, eliminating courier fees and receiving quicker funds availability to their accounts. This process helps to reduce potential loss of checks or fraud. Security to the small business depositor is strengthened.

- **Help your smaller customers take advantage of Remote Deposit Capture**

Utilizing this small, cost-effective scanner, the ease of depositing checks and cost savings associated with Remote Deposit Capture is now available to all businesses, regardless of their size or the number of checks they process daily. The convenience of remote check capture is brought to the fingertips of all businesses, ensuring all your customers' needs are met.

- **Offer more choice to your customers**

Depending on your price and performance requirements, NCR has a full range of scanners to meet all business and financial objectives. The NCR suite of scanner devices has been broadened with the addition of the NCR Personal Scanner. This convenient scanner is suitable to those smaller volume business sites that process up to 25 checks per day, opening up a new commercial market to you.
