

NCR SelfServ™ 28

Fully Weatherized Freestanding Cash Dispenser

Looking for an ATM that can
be deployed anywhere?

YES

The only fully weatherized, freestanding ATM on the market

To achieve leadership in a consumer-facing market, your brand has to be available wherever your customers are; the NCR SelfServ 28 can provide that availability. This unique, freestanding ATM can be deployed anywhere—indoors or outdoors—with minimal infrastructure requirements, providing maximum brand exposure, transaction volumes and revenue combined with a low cost of ownership.

- **Redefined availability**

Real availability is about delivering the transactions that consumers want, where and when they need them. With new “self-healing” technology, easy-to-use service lead-through application, and front service access, NCR SelfServ redefines availability.

- **Informed manageability**

NCR SelfServ provides best-in-class data for network management. Clear visibility to configurations, software versions and the activity levels of each module results in more accurate, timely management decisions and operational excellence.

- **Committed responsibility**

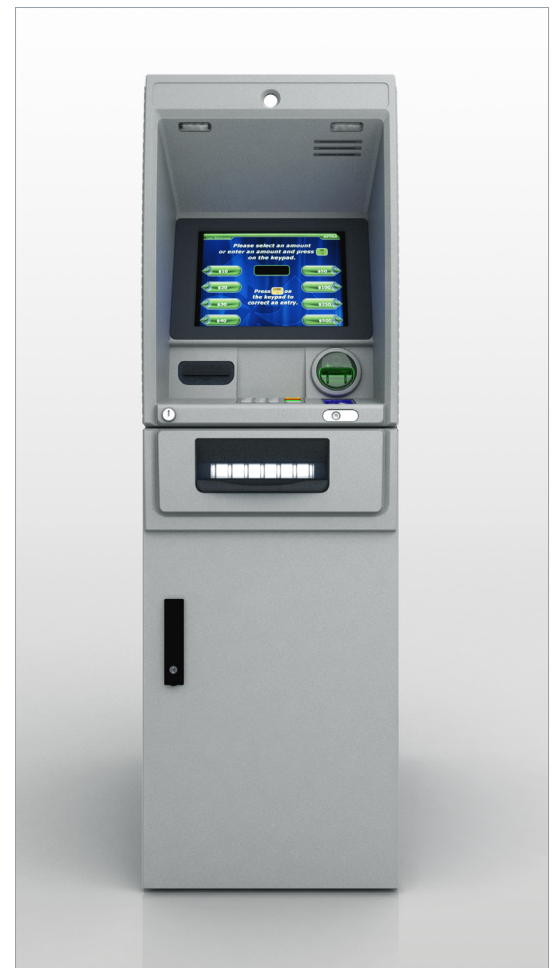

Low-energy LED lighting, 25% less cabling and reduced requirements for on-site service visits are just some of the ways we’ve lowered the carbon footprint of each ATM. NCR SelfServ will be a valuable asset in achieving the environmental goals for your business.

- **Intuitive usability**

NCR SelfServ enables consumers, cash-in-transit companies, branch staff and service engineers to become experts after the very first use, resulting in better operational efficiency, staff utilization and consumer satisfaction.

- **Intrinsic security**

Incorporating a unique protected USB architecture and a range of antifraud and physical security solutions, NCR SelfServ reduces fraud risk and maintains the integrity of your self-service channel for you and your customers.
